Sistema disinfezione con tasche - Disinfection with pocket mop heads - Desinfektion mit Bezügen mit Taschen

Il sistema utilizza i telai pieghevoli disponibili in varie misure, tra cui il telaio Uniko. Uniko, grazie al sistema di fissaggio della frangia al telaio, evita all'operatore di doversi continuamente piegare per agganciare o sganciare il ricambio dal telaio.

Disinfection system with pocket mop heads and foldable mop holders in different sizes, including Uniko mop holder. Thanks to the special fixing system of the mop head to the frame, Uniko saves the operator from bending continuously to fix and drop the mop head.

Unser Desinfektionssystem bietet eine große Auswahl an Mophaltern in verschiedenen Größen, besonders unseren Uniko Klappmophalter. Dank dem besonderen Uniko Mophalter Befestigung-System des Bezugs soll sich der Benutzer nicht mehr bücken, um den Halter in den Bezug einzuführen und ihn vom Halter zu nehmen.
